# About Company

Ovi Enterprises is a leading manufacturer of precision solid carbide cutting tools, known for our commitment to quality and innovation. Our expert team designs and produces custom tools that deliver superior performance, durability, and cost-effectiveness, making us a trusted partner in the cutting tool industry. We continuously invest in advanced technologies to enhance our manufacturing capabilities. With a strong focus on customer satisfaction, we ensure each tool meets the highest standards of precision and reliability.

## Mission

To deliver high-quality, precision cutting tools that meet the unique needs of our clients, driving innovation and excellence in the manufacturing industry through advanced engineering solutions.

## Vision

To deliver high-quality, precision cutting tools that meet the unique needs of our clients, driving innovation and excellence in the manufacturing industry through advanced engineering solutions.

## Core Values

# Machinery Capabilities

The V2 ADVANCED Maxima is a 5-axis tool grinding machine for 2mm-20mm carbide tools, offering precision, short cycle times, eco-friendly design, and user-friendly software for efficient tool grinding and regrinding.

The FX Linear machine range is designed for light manufacturing, regrinding, and full production, featuring ANCA linear motors and precise wheel positioning for improved accuracy, productivity, and ease of use.

# LET'S WORK TOGETHER
